

Are you a working radiographer with experience in night shifts? I'm conducting research for my BSc dissertation on "The Effects of Night Shifts on Radiographers" and would value your participation!

What's involved:

- A short survey about your experiences with night shifts
- Approximately 10 minutes of your time
- Complete anonymity and confidentiality guaranteed

Your insights will help build understanding of how night shifts affect radiographers' wellbeing and practice, potentially informing future workplace policies.

Scan the QR code on the attached flyer or click the link in my bio to participate. Please share with colleagues who might be interested!
